

About ForSec

ForSec is a team of operators who build defenses. 16+ years of hands-on CERT/SOC experience from the Norwegian public sector — now available for your organization.

Our Background

ForSec grew out of real operations. Our team spent over a decade building and running CERT/SOC environments in Norwegian public sector — writing detection rules, responding to incidents, performing forensics, and hardening infrastructure under live threat conditions. We started ForSec because we saw too many organizations getting generic security advice from consultants who had never sat in a SOC. We bring the operator mindset: practical, technical, and battle-tested.

consultants who had never sat in a SOC. We bring the operator mindset: practical, technical, and battle-tested.

The Team

Kim Ytredal

Principal Security Lead

Grimstad, Norway
